SW SH1024PUB Manguera espiral

**Poliuretano, Ø10x6,5mm, L=2,4m,
Espiral Ø33mm, AG 1/4" BSP(T)**

SW SH1024PUB is a spiral hose of the latest generation. It is reinforced with a nylon net. Despite the reinforcement, the hose is very flexible. Due to the small windings the hose offers optimal handling, even in small spaces. Kink protection on both sides and high-quality 360° rotating connections round off the overall concept of the new PU hose. The spiral hose is available in the following lengths: 2.4m/3.6m/5.0m/7.5m.

Datos técnicos

Número de artículo	769602
Peso	0,235 kg
Presión max. de funcionamiento	15 bar
Gama de presión de funcionamiento	-20° / +60°
Outside coil diameter	55 mm
Diametro de manguera (exterior)	10 mm
Diametro de manguera (interior)	6,5 mm
Conexión	1/4"
Asilante	Polyurethan (PU)
