SW 33050 Balancer - max. 1,3m cable length / 3,0 - 5,0kg

swepro SW 33050 - The swepro balancers are characterised by their durability and precision. The balancer provides reliable relief during assembly activities and enables smooth work processes. A balancer is fixed to the suspension above the work area. On the front there is a rotatable adjustment facility for the spring balancer to adapt its resistance to the weight of the suspended implement. The SW 33050 is suitable for a weight of 3 to 5kg and has a maximum spring travel of 1.3m.
